FYP

RENTPAY

A web-based unified platform that allows users to rent different items based on their needs.

PROFILE

Results-driven software developer with 4 years of experience building scalable web and mobile applications. Skilled in delivering clean, efficient code and solving complex technical problems. Collaborates effectively with teams to deliver high-quality features on time and improve overall product performance.

EXPERIENCE

FRONT-END DEVELOPER @ CODESWAVE

04/24 – Present

- Building and maintaining scalable front-end apps using Angular, React, Next.js, and TypeScript.
- Collaborating with designers to convert Figma layouts into functional UI.
- Developing responsive UIs using Tailwind, and Material UI.
- Collaborating with backend teams for API improvements and bug fixes.
- Developing basic REST APIs with Node.js/Express and MongoDB.
- Deploying angular applications on AWS using Nginx

JUNIOR FRONT-END DEVELOPER @ SWIPBOX

04/23 – 04/24

- Developing modern UIs using Angular with clean TypeScript architecture.
- Enhancing UI/UX using Bootstrap, Sass, and Tailwind.
- Implementing reusable services and shared modules for code consistency.
- Participating in sprint planning, DSUs and reflection sessions to contribute to an agile development process.
- Following the best coding practices and implementing extensions like Prettier and ESLint to write clean and clear code.

JUNIOR FRONT-END DEVELOPER @ HOLODECK

09/21 – 04/23

- Developing responsive UI components using Angular, Ionic, and JavaScript, and CSS frameworks.
- Implementing API-based data rendering and form validations.
- Assisting in converting legacy code to modern Angular standards.
- Integrating basic authentication flows and role-based UI handling.
- Working closely with the team and collaborating via GitHub.
