Rawalpindi, Pakistan | 11/21 - 06/22

- Developing native apps in Ionic and designing mobile app interfaces using Bootstrap.
- Using Node.js (Express) and MongoDB to build scalable REST API-based services.
- Architectural Design and implementation of complex SQL/NoSQL queries using PostgreSQL, MongoDB, and Firebase.

Backend Engineer (Intern) @ [Asasa Technologies](#)

Islamabad, Pakistan | 06/19 - 11/19

- Working with Node.js frameworks to develop REST APIs.
- Performing database operations using MongoDB.
- API documentation using Swagger/OpenAPI.

Projects

[LittleLet](#)

ZW | 2024-25

LittleLet is an online accommodation marketplace in Zimbabwe. It connects travelers with unique, comfortable, and affordable short-term stays, ranging from city apartments and hotels to countryside lodges. The platform aims to simplify the search for reliable lodging while promoting local hospitality across the country.

[Cash Canvas](#)

ZW | 2025-26

Cash Canvas is an all-in-one financial management platform designed for smart money moves. It allows users to track income, expenses, investments, and debts in one place while offering AI-driven insights through its "CashBot" tool. The platform features shared canvases for household planning and multi-currency support to help individuals and families grow their wealth with confidence.

[DialEats](#)

ZW | 2019-21

Dial Eats is a food delivery service in Zimbabwe. Customers can order meals from local restaurants and get them delivered right to their door. The platform helps people easily enjoy their favorite foods at home, offering a variety of dining options.

[Agent Market](#)

AUS | 2018-19

AgentMarket is an online real estate site in Australia. It lets people find homes, compare listings, and connect with local agents for buying, selling, or renting. The platform aims to make property transactions easier by bringing buyers, sellers, and agents together in one place.

[Swapco](#)

AUS | 2022-23

SwapCo is a pioneering mobile application, designed to facilitate the swapping of goods and services among users. It offers a platform where individuals can exchange a wide range of items and services, from gardening tools to beauty treatments.

Education

International Islamic University

Islamabad, Pakistan

Bachelor of Software Engineering (2017 - 2021)
